DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by USP 6,649,624 to Fukami et al. (herein referred to as "Fukami").

Fukami teaches a method of producing 3-oxo-N-(5-phenyl-2-pyrazinyl)-spiro[isbenzofuran-1(3H),4'-piperidine]-1'-carboxamide, which corresponds to the instantly recited compound of formula I. The compound is produced by coupling a compound of formula II with a compound of formula III in the presence of an organic base in a solvent system. See col. 19, lines 1-63. The base is triethylamine and the inert solvent may be tetrahydrofuran, dimethylformamide, or dimethyl sulfoxide (col. 21, lines 1-10). The compound of formula III may be prepared according to the scheme set forth in col. 24, lines 20-55.

Allowable Subject Matter

3. Claims 6-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1743

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest the process of claim 1 additionally comprising combining the compound of formula IV and phenyl chloroformate in an organic solvent system to yield the compound of formula III in the presence of a catalyst.
